

Why Summit Claim Services, Inc.? Because EXCELLENCE is no accident.

SUMMIT recognizes that the Insurance industry is customer-centric.

Summit knows "the moment of truth" comes with a filed claim and that Industry advertising promotes responsiveness and quality of claims services because policyholders are quick to share experiences. Therefore, we understand the importance of a quick response and making sure your policyholder recovers quickly following a loss. It's as if you were handling the claim yourself. In this manner, your policyholder can share a positive experience.

SUMMIT enables carriers to achieve the goal of claims excellence.

Summit supports the entire claims process with a team of responsive professionals that interact in-person with claimants early in the process, in essence becoming the face of the insurance company, and are supported by claims software to quickly and accurately prepare an estimate to repair damages

SUMMIT enables carriers to deliver on their core promise of dependability.

Industry advertising has established a heightened sense of entitlement and policyholders expect prompt and attentive assistance. Catastrophes happen daily to your policyholders and we handle those daily catastrophes at the personal level. We are there to make sure policyholder needs are met when they suffer their own individual loss.

SUMMIT cares about its Client's objectives:
